Advanced Retinol

Global Anti-aging Retinol Serum - Anti-aging serum. A powerful product recommended for mature skin, with signs of photoaging or acne. Thanks to the retinol content together with the milk peptide complex it perfectly improves the appearance of the skin. The versatility of the beneficial effects of retinol makes it suitable for both acne and normal skin with the problem of aging. The serum normalizes excessive sebum secretion, regulates skin keratinization, preventing acne lesions. It improves skin tone and reduces the appearance of spots and discoloration. In addition, it improves the level of skin hydration and has a strong antioxidant effect protecting the skin against the negative effects of free radicals. Limits the visibility of wrinkles, both thin and delicate as well as more established. It improves the density and cohesiveness of the skin, strengthens the laxity and improves the face oval. The product is free of irritant properties characteristic of retinol, it can also be used on slightly more sensitive skins. Makes the skin look young and refreshed. It becomes more radiant and perfectly tense.
